

Urban Mobility innovation index Forum

MEETING AGENDA –21 November 2016

Venue: Royal Mirage Dubai

This meeting is the first Urban Mobility Innovation **Forum**. Taking place in Dubai during the UAE Innovation week, it is organised by RTA in collaboration of UITP and FCC, as part of the development of the **Urban Mobility innovation index (UMii)**.

UMii aims to provide insights into urban mobility and innovation in cities across the world, and to deliver a **guide for cities to foster innovation** in their urban mobility services and systems.

Data is collected from cities worldwide and will be analysed and produced in a final report. The research methodology is based on **9 composite indicators** that enable inter-city comparison and conversation, rather than scoring and ranking cities competitively.

The **UMii Forum** allows cities contributing to UMii to exchange knowledge and learn “best and next practices”, to enable city leaders and their officials to develop policies and conditions that result in innovative mobility solutions.

UMii was initiated by [RTA](#), its main sponsor, and is implemented by [UITP](#) in collaboration with [Future Cities Catapult](#).

UMii was officially announced on the 28th of August 2016 by His Highness Sheikh Hamdan Bin Mohammed Bin Rashed Al Maktoum – Crown Prince of Dubai.

The first results of the project will be presented at the [Global Public Transport Summit](#) (15-17 May 2017) in Montréal.
